Semiannual Regulatory Agenda, Spring 2008

AGENCY: Office of the Secretary, USDA.

ACTION: Semiannual regulatory agenda.

SUMMARY: This agenda provides summary descriptions of significant and not significant regulations being developed in agencies of the U.S.

Department of Agriculture (USDA) in conformance with Executive Order 12866 “Regulatory Planning and Review.”

USDA has attempted to list all regulations and regulatory reviews pending at the time of publication, except for minor and routine or repetitive actions, but some may have been inadvertently missed. There is no legal significance to the omission of an item from this listing. Also, the dates shown for the steps of each action are estimated and are not commitments to act on or by the date shown.

USDA’s complete regulatory agenda is available online at www.reginfo.gov. Because publication in the **Federal Register** is mandated for the regulatory flexibility agendas required by the Regulatory Flexibility Act (5 U.S.C.

602), USDA’s printed agenda entries include only:

(1) Rules that are likely to have a significant economic impact on a substantial number of small entities; and

(2) Rules identified for periodic review under section 610 of the Regulatory Flexibility Act.

FOR FURTHER INFORMATION CONTACT: For further information on any specific entry shown in this agenda, please contact the person listed for that action. For general comments or inquiries about the agenda, please contact Michael Poe, Office of Budget and Program Analysis, U.S. Department of Agriculture, Washington, DC 20250, (202) 720-1272.

Dated: March 7, 2008.

Michael Poe,

Chief, Legislative and Regulatory Staff.

Agricultural Marketing Service—Prerule Stage

Sequence Number	Title	Regulation Identifier Number
1	National Organic Program: Add Standards for the Organic Certification of Wild Captured Aquatic Animals (TM-01-08)	0581-AB97
2	National Organic Program: Dairy Replacement Animals (Livestock) (TM-07-03)	0581-AC69
3	National Organic Program, 2011 Sunset (Expiration) Review (Crops and Processing) (TM-07-14)	0581-AC77

Prerule Stage

1. NATIONAL ORGANIC PROGRAM: ADD STANDARDS FOR THE ORGANIC CERTIFICATION OF WILD CAPTURED AQUATIC ANIMALS (TM-01-08)

Legal Authority: 7 USC 6501 through 6522

Abstract: The Agricultural Marketing Service (AMS) is revising regulations pertaining to labeling of agricultural products as organically produced and handled (7 CFR part 205). The term “aquatic animal” will be incorporated in the definition of livestock to establish production and handling standards for operations that capture aquatic animals from the wild. Production standards for operations producing aquatic animals will incorporate requirements for livestock origin, feed ration, health care, living conditions, and recordkeeping. Handling standards for such operations will address prevention of commingling of organically produced commodities and prevention of contact between organically produced and prohibited substances.

RIN: 0581-AB97

2. NATIONAL ORGANIC PROGRAM: DAIRY REPLACEMENT ANIMALS (LIVESTOCK) (TM-07-03)

Legal Authority: 7 USC 6501

Abstract: The Agricultural Marketing Service (AMS) is amending the National Organic Program regulations to clarify the regulations. This rule is seeking input on the following issues: (1) Are the current origin of livestock requirements in the NOP regulations adequate for dairy livestock under principles of organic livestock management and production? (2) If the current origin of livestock requirements as described in the NOP regulations are not adequate, how should they be

changed? (3) If the regulations should be changed, how much time should be allowed for the industry to implement the regulation change? This action is being taken to ensure that NOP regulations are clear and consistent, stimulate growth of the organic sector, satisfy consumer expectations, and allow organic producers and handlers flexibility in making site-specific, real-time management decisions.

3. • NATIONAL ORGANIC PROGRAM, 2011 SUNSET (EXPIRATION) REVIEW (CROPS AND PROCESSING) (TM-07-14)**Legal Authority:** 7 USC 6501

Abstract: The Agricultural Marketing Service (AMS) is amending regulations pertaining to the National List of Allowed and Prohibited Substances. As required by the National Organic Foods Production Act of 1990, the allowed use of the 12 synthetic and non-synthetic substances in organic production and handling will expire on September 12, 2001. The AMS is publishing an advance notice of

proposed rulemaking to make the public aware of this requirement. AMS believes that public comment is essential in the review process to determine whether these substances should continue to be allowed or prohibited in the production and handling of organic agricultural products.

RIN: 0581-AC77**Department of Agriculture (USDA)
Agricultural Marketing Service (AMS)****Proposed Rule Stage****4. NATIONAL ORGANIC PROGRAM: ACCESS TO PASTURE (TM-05-14)****Legal Authority:** 7 USC 6501 et seq

Abstract: The National Organic Program (NOP) is administered by the Agricultural Marketing Service (AMS). Under the NOP, AMS established national standards for the production and handling of organically produced agricultural products. Since implementation of the NOP, some members of the public have advocated for a more explicit regulatory standard on the relationship between livestock, particularly dairy animals, and grazing land. They have asserted the current regulatory language on access to pasture for ruminants and temporary confinement based on an animal's stage of production, when applied together, do not provide a uniform requirement for the pasturing of ruminant animals that meet the principles underlying an organic management system for livestock and livestock products that consumers expect. Comments received as a result of the proposed rule will assist in determining the Agency's next steps in rulemaking on this issue.

Final Rule Stage

6. MANDATORY COUNTRY OF ORIGIN LABELING OF BEEF, PORK, LAMB, FISH, PERISHABLE AGRICULTURAL COMMODITIES, AND PEANUTS (LS-03-04)

Legal Authority: 7 USC 1621 through 1627, Agricultural Marketing Act of 1946

Abstract: The Farm Security and Rural Investment Act of 2002 (Farm Bill) (Pub. L. 107-171) and the 2002 Supplemental Appropriations Act (2002 Appropriations) (Pub. L. 107-206) amended the Agricultural Marketing Act of 1946 (Act) (7 U.S.C. 1621 et seq.) to require retailers to notify their customers of the country of origin of covered commodities beginning September 30, 2004. Covered commodities include muscle cuts of beef (including veal), lamb, and pork; ground beef, ground lamb, and ground pork; farm-raised fish and shellfish; wild fish and shellfish; perishable agricultural commodities; and peanuts. The FY 2004 Consolidated Appropriations bill (2004 Appropriations) (Pub. L. 108-199) delayed implementation of mandatory Country of Origin Labeling (COOL) for all covered commodities except wild and farm-raised fish and shellfish until September 30, 2006. The FY 2006 Agriculture Appropriations Bill further delayed the implementation date for

other covered commodities until September 30, 2008.

RIN: 0581-AC26

7. MANDATORY REPORTING FOR DAIRY PROGRAMS (DA-06-07)

Legal Authority: PL 106-532

Abstract: The Agricultural Marketing Service is proposing to establish a Dairy Product Mandatory Reporting Program. The program would: (1) Require persons engaged in manufacturing dairy products to provide the Department of Agriculture certain information including price, quantity, and moisture content of dairy products sold by the manufacturer and (2) require manufacturers and other persons storing dairy products to report to USDA information on the quantity of dairy products stored.

8. TUBERCULOSIS IN CATTLE; IMPORT REQUIREMENTS (SECTION 610 REVIEW)

Legal Authority: 7 USC 1622; 7 USC 8301 to 8317; 21 USC 136 and 136a; 31 USC 9701

Abstract: This rulemaking would amend the regulations regarding the importation of animals into the United States to establish several levels of risk classifications to be applied to foreign regions with regard to tuberculosis and to establish requirements governing the importation of cattle and captive bison based on each risk classification. These changes are necessary to help ensure that cattle and captive bison infected with tuberculosis are not imported into the United States.

10. IMPORTATION OF PLANTS FOR PLANTING; ESTABLISHING A NEW CATEGORY OF PLANTS FOR PLANTING NOT AUTHORIZED FOR IMPORTATION PENDING RISK ASSESSMENT (RULEMAKING RESULTING FROM A SECTION 610 REVIEW)

Legal Authority: 7 USC 450; 7 USC 7701 to 7772; 7 USC 7781 to 7786; 21 USC 136 and 136a

Abstract: This action would establish a new category in the regulations governing the importation of nursery stock, also known as plants for planting. This category would list taxa of plants for planting whose importation is not authorized pending risk assessment. We would allow foreign governments to request that a pest risk assessment be conducted for a taxon whose importation is not authorized pending risk evaluation. After the pest risk assessment was completed, we would conduct rulemaking to remove the taxon from the proposed category if determined appropriate by the risk assessment. We are also proposing to expand the scope of the plants regulated in the plants for planting regulations to include non-vascular plants. These changes would allow us to react more quickly to evidence that a taxon of plants for planting may pose a pest risk while ensuring that our actions are based on scientific evidence.

RIN: 0579-AC03

11. MINIMUM AGE REQUIREMENTS FOR THE TRANSPORT OF ANIMALS

Legal Authority: 7 USC 2131 to 2159

Abstract: This rulemaking would amend the Animal Welfare Act regulations by adding minimum age and weaning requirements for the transport in commerce of animals. The regulations currently contain such requirements for dogs and cats, but no corresponding ones for other regulated animals, despite the risks associated with the early transport of these species. The rule would also provide an exemption to allow animals to be transported without their mothers for medical treatment and for scientific research before reaching the minimum age and weaning requirement, provided certain conditions are met. Establishing minimum age requirements for the transport of animals and providing for the transport of animals that have not met the minimum age requirements are necessary to help ensure the humane treatment of these animals.

RIN: 0579-AC14

12. TUBERCULOSIS IN CATTLE; IMPORT REQUIREMENTS FOR ROPING STEERS

Legal Authority: 7 USC 1622; 7 USC 8301 to 8317; 21 USC 136 and 136a; 31 USC 9701

Abstract: This rulemaking would amend the animal importation regulations to require that steers and spayed heifers with more than 3 inches of horn growth that are entering the United States from Mexico meet more stringent tuberculosis testing requirements than those with 3 inches or less. In their current form, the regulations do not distinguish between steers and spayed heifers imported strictly as feeders and those with

sufficient horn growth to enable them to be used as rodeo cattle. Steers and spayed heifers used as rodeo cattle are often maintained longer than feeder cattle and generally come into contact with other cattle in more locations than do steers and spayed heifers imported for feeding purposes. The longer the lifespan of an animal, the greater the chances are that, if exposed to tuberculosis, it will contract the disease, develop generalized disease, and spread it to other animals. The risk of tuberculosis spread is also increased by the number of animals that are exposed to a tuberculosis-infected animal. We believe the risks of tuberculosis transmission associated with rodeo cattle justify requiring more rigorous tuberculosis testing for such animals than for those imported as feeders. This rulemaking is intended to reduce the risk of imported cattle transmitting tuberculosis to domestic livestock in the United States. This rulemaking replaces a previously published proposed rule, which we are withdrawing as part of this document, that would have required that steers and spayed heifers with any evidence of horn growth that are entering the United States meet the same tuberculosis testing requirements as sexually intact animals entering the United States.

13. • HANDLING OF ANIMALS; CONTINGENCY PLANS

Legal Authority: 7 USC 2131 to 2159

Abstract: This rulemaking would amend the Animal Welfare Act regulations to add requirements for contingency planning and training of personnel by research facilities and by

USDA—APHIS

Proposed Rule Stage

dealers, exhibitors, intermediate handlers, and carriers. We are proposing these requirements because we believe all licensees and registrants should develop a contingency plan for all animals regulated under the Animal Welfare Act in an effort to better prepare for potential disasters. This action would heighten the awareness of licensees and registrants regarding their responsibilities and help ensure a timely and appropriate response should an emergency or disaster occur.

RIN: 0579-AC69

14. • BOVINE TUBERCULOSIS**Legal Authority:** 7 USC 8301 to 8317

Abstract: This rulemaking would amend the bovine tuberculosis regulations by removing from incorporation by reference the Bovine Tuberculosis Eradication Uniform Methods and Rules, 1999, and including in 9 CFR part 77 all Federal requirements. We are also proposing a number of substantive changes to the requirements in order to enhance our bovine tuberculosis eradication efforts. The proposed changes include, but are not limited to, tightening certain tuberculosis surveillance and reporting requirements; strengthening the quarantine and quarantine-release requirements; setting minimum testing ages, depending upon the status of the State or zone of origin and/or the purpose of movement, when testing is required for interstate movement of cattle and bison; adding new requirements to prevent the spread of

tuberculosis from wildlife to cattle and bison; adding new requirements for interstate movement of dairy cattle; strengthening the requirements for individual cattle and bison that are to be added to accredited herds; and providing for the interstate movement of commuter herds. Finally, we would reorganize 9 CFR part 77 to make the regulations clearer and easier to use.

15. PHYTOSANITARY CERTIFICATES FOR IMPORTED FRUITS AND VEGETABLES

Legal Authority: 7 USC 450; 7 USC 7701 to 7772; 7 USC 7781 to 7786; 21 USC 136 and 136a

Abstract: Currently APHIS does not require a phytosanitary certificate to accompany fruits and vegetables imported into the United States except for certain fruits and vegetables grown in designated foreign regions. This rule would require a phytosanitary certificate to accompany all noncommercial shipments of fruits and vegetables imported into the United States by air passengers.

16. PHYTOPHTHORA RAMORUM; QUARANTINE AND REGULATIONS

Legal Authority: 7 USC 7701 to 7772; 7 USC 7781 to 7786

Abstract: This action will amend the Phytophthora ramorum regulations to make the regulations consistent with a Federal Order issued by APHIS in

December 2004 that established restrictions on the interstate movement of nursery stock from nurseries in nonquarantined counties in California, Oregon, and Washington. This action will also update conditions for the movement of regulated articles of nursery stock from quarantined areas, as well as restrict the interstate movement of all other nursery stock from nurseries in quarantined areas. We are also updating the list of plants regulated because of *P. ramorum* and the list of areas that are quarantined for *P. ramorum* and making other miscellaneous revisions to the regulations. These actions are necessary to prevent the spread of *P. ramorum* to noninfested areas of the United States. We will continue to update the regulations through additional rulemakings as new scientific information on this pathogen becomes available.

17. INTERSTATE MOVEMENT OF SHEEP AND GOATS; APPROVED LIVESTOCK FACILITIES, IDENTIFICATION, AND RECORDKEEPING REQUIREMENTS

Legal Authority: 7 USC 8301 to 8317

Abstract: This rulemaking will amend the regulations regarding the interstate movement of animals to require livestock facilities that handle sheep or goats in interstate commerce to be approved by APHIS. These will include stockyards, livestock markets, buying stations, concentration points, or any other premises where sheep or goats in interstate commerce are assembled. APHIS' approval will be contingent on the facility operator meeting certain minimum standards and other conditions relating to the receipt, handling, and release of sheep and goats at the facility, as well as complying with certain animal identification and recordkeeping requirements. The standards and other conditions will be based, in part, on recently implemented regulations relating to the interstate movement of sheep and goats in order to control the spread of scrapie, a serious disease of sheep and goats. This rule will provide for the establishment of standards for the approval of livestock facilities that handle sheep or goats in interstate commerce.

18. BOLL WEEVIL; QUARANTINE AND REGULATIONS

Legal Authority: 7 USC 7701 to 7772; 7 USC 7781 to 7786

Abstract: This action establishes domestic boll weevil regulations that will restrict the interstate movement of regulated articles within regulated areas and from regulated areas into or through nonregulated areas in commercial cotton producing States. The regulations will help prevent the artificial spread of boll weevil into noninfested areas of the United States and the reinfestation of areas from which the boll weevil has been eradicated.

19. TRICHINAE CERTIFICATION PROGRAM

Legal Authority: 7 USC 8301 to 8317; 7 USC 1622; 15 USC 1828; 21 USC 136a

Abstract: This action establishes a voluntary Trichinae Certification Program for U.S. pork that has been produced under disease-prevention conditions. Under the program, we will certify pork production sites that follow prescribed good production practices that reduce, eliminate, or avoid the risk of exposure of animals to zoonotic parasites of the species Trichinella, a disease of swine. Such a program should enhance the ability of producers to export pork and pork products to overseas markets. This program has been developed as a cooperative effort by the U.S. Department of Agriculture, the National Pork Board, and the pork processing industry. If adopted, this program will include those producers who choose to participate in the program, as well as slaughter facilities and other persons that handle or process swine from pork production sites that have been certified under the program.

20. SPECIAL NEED REQUESTS UNDER THE PLANT PROTECTION ACT

Legal Authority: 7 USC 7701 to 7772; 7 USC 7781 to 7786

Abstract: This action amends our domestic quarantine regulations to establish a process by which a State or political subdivision of a State could request approval to impose prohibitions or restrictions on the movement in interstate commerce of specific articles that are in addition to the prohibitions and restrictions imposed by the Animal and Plant Health Inspection Service. The Plant Protection Act provides that States or political subdivisions of States may make such special need requests,

but there are currently no procedures in place for their submission or consideration. This action establishes a process by which States may make a special need request.

21. STANDARDS FOR PERMANENT, PRIVATELY OWNED HORSE QUARANTINE FACILITIES (SECTION 610 REVIEW)

Legal Authority: 7 USC 1622; 7 USC 8301 to 8317; 21 USC 136 and 136a; 31 USC 9701

Abstract: This rulemaking establishes standards for the approval of permanent, privately owned quarantine facilities for horses. We are taking this action because demand for quarantine services for horses exceeds the space available at existing facilities. We believe that allowing imported horses to be quarantined in permanent, privately owned quarantine facilities that meet these newly proposed criteria facilitates the importation of horses while continuing to protect against the introduction of communicable diseases of horses.

22. NATIONAL VETERINARY ACCREDITATION PROGRAM (RULEMAKING RESULTING FROM A SECTION 610 REVIEW)

Legal Authority: 7 USC 8301 to 8317; 15 USC 1828

Abstract: This rulemaking amends the regulations regarding the National Veterinary Accreditation Program to establish two accreditation categories in place of the current single category, to add requirements for supplemental training and renewal of accreditation, and to offer accreditation specializations. These changes are intended to support the Agency's animal health safeguarding initiatives, to involve accredited veterinarians in integrated surveillance activities, and to make the provisions governing our National Veterinary Accreditation Program more uniform and consistent.

23. CITRUS CANKER; COMPENSATION FOR CERTIFIED CITRUS NURSERY STOCK

Legal Authority: 7 USC 7701 to 7772; 7 USC 7781 to 7786

Abstract: This rulemaking establishes provisions under which eligible commercial citrus nurseries may, subject to the availability of appropriated funds, receive payments for certified citrus nursery stock destroyed to eradicate or control citrus canker. The payment of these funds is necessary in order to reduce the economic effects on affected commercial citrus nurseries that have had certified citrus nursery stock destroyed to control citrus canker.

24. AGRICULTURAL INSPECTION AND AQI USER FEES ALONG THE U.S./CANADA BORDER

Legal Authority: 7 USC 450; 7 USC 7701 to 7772; 7 USC 7781 to 7786; 7 USC 8301 to 8317; 21 USC 136 and 136a; 49 USC 80503

Abstract: This action amends the foreign quarantine and user fee regulations by removing the exemptions from inspection for fruits and vegetables grown in Canada and the exemptions from user fees for commercial vessels, commercial trucks, commercial railroad cars, commercial aircraft, and international air passengers entering the United States from Canada. As a result of this action, all agricultural products imported from Canada will be subject to inspection, and commercial conveyances, as well

USDA—APHIS

73

as airline passengers arriving on flights from Canada, will be subject to inspection and user fees. We are taking this action in part because we are not recovering the costs of our current inspection activities at the U.S./Canada border. In addition, our data show an increasing number of interceptions on the U.S./Canada border of prohibited material that originated in regions other than Canada that presents a high risk of introducing plant pests or animal diseases into the United States. These findings, combined with additional Canadian airport preclearance data on interceptions of ineligible agricultural products approaching the U.S. border from Canada, strongly indicate that we need to expand and strengthen our pest exclusion and smuggling interdiction efforts at that border. In order to do this and to recover the costs of our existing inspection activity, we need to collect user fees from commercial conveyances and international air passengers entering the United States from Canada.

RIN: 0579-AC06**25. CITRUS CANCKER; QUARANTINE OF THE STATE OF FLORIDA**

Legal Authority: 7 USC 7701 to 7772; 7 USC 7781 to 7786

Abstract: This action will amend the citrus canker regulations to list the entire State of Florida as a quarantined area for citrus canker and to amend the requirements for the movement of regulated articles from Florida now that the eradication of citrus canker in

Florida is no longer being carried out as an objective. It will also amend the regulations to allow regulated articles that would not otherwise be eligible for interstate movement to be moved to a port for immediate export. These changes are necessary in light of the Department's determination that the established eradication program was no longer a scientifically feasible option to address citrus canker.

RIN: 0579-AC07**26. USER FEES; EXPORT CERTIFICATION FOR PLANTS AND PLANT PRODUCTS**

Legal Authority: 7 USC 7701 to 7772; 7 USC 7781 to 7786; 7 USC 8301 to 8317; 21 USC 136 and 136a; 49 USC 80503

Abstract: This rulemaking would amend the user fee regulations by adjusting the fees charged for export certification of plants and plant products. The rule would increase these user fees to reflect the anticipated costs associated with providing these services. It would also add a new user fee for Federal export certificates for plants and plant products that an exporter obtains from a State or county cooperator in order to recover administrative costs associated with that service. Finally, it would make several nonsubstantive changes to the regulations for clarity. These changes would enable us to properly recover the costs of providing export certification services for plants and plant products.

28. • VIRAL HEMORRHAGIC SEPTICEMIA; INTERSTATE MOVEMENT AND IMPORT RESTRICTIONS ON CERTAIN LIVE FISH

Legal Authority: 7 USC 1622; 7 USC 8301 to 8317; 21 USC 136 and 136a; 31 USC 9701

Abstract: This rulemaking will establish regulations to restrict the interstate movement and importation

into the United States of live fish that are susceptible to viral hemorrhagic septicemia, a highly contagious disease of certain fresh and saltwater fish. In 2005 and 2006, viral hemorrhagic septicemia was detected in freshwater fish in several of the Great Lakes and related tributaries. The disease has been responsible for several large-scale die-offs of wild fish in the Great Lakes region. This action is necessary to prevent further introductions into, and dissemination within, the United States of viral hemorrhagic septicemia.

Long-Term Actions

29. PLANT PEST REGULATIONS; UPDATE OF CURRENT PROVISIONS (SECTION 610 REVIEW)

Legal Authority: 7 USC 450; 7 USC 7711 to 7772; 7 USC 7781 to 7786; 7 USC 8301 to 8317; 21 USC 136 and 136a; 31 USC 9701

Abstract: APHIS is undertaking rulemaking to amend its plant pest regulations by: (1) Setting out the criteria that will be used by APHIS when considering whether an organism is a plant pest; (2) adding a permit category for organisms that would be released into the environment for purposes such as the biological control of weeds; (3) establishing a notification system that could be used in place of permits for the importation and interstate movement of regulated organisms; and (4) revising or amending existing portions of the regulations to clarify or update requirements, eliminate redundancy, and make the regulations easier for the public to use. This action will serve as a follow-up to the advance notice of proposed rulemaking that APHIS published in the Federal Register on September 27, 1996, to solicit input on the need for regulatory changes and alternative methods of addressing plant pest risk.

30. ANIMAL WELFARE: MARINE MAMMALS; NONCONSENSUS LANGUAGE AND INTERACTIVE PROGRAMS (RULEMAKING RESULTING FROM A SECTION 610 REVIEW)

Legal Authority: 7 USC 2131 to 2159

Abstract: The U.S. Department of Agriculture regulates the humane handling, care, treatment, and transportation of certain marine mammals under the Animal Welfare Act. The present standards for these animals have been in effect since 1979, and amended in 1984. During this time, advances have been made and new information has been developed with regard to the housing and care of marine mammals. This rulemaking addresses marine mammal standards on which consensus was not reached

during negotiated rulemaking conducted between September 1995 and July 1996. These include standards affecting variances, indoor facilities, outdoor facilities, space requirements, and water quality, as well as swim-with-the-dolphin programs. These actions appear necessary to ensure that the minimum standards for the humane handling, care, treatment, and transportation of marine mammals in captivity are based on current general, industry, and scientific knowledge and experience.

32. ANIMAL WELFARE; CLIMATIC AND ENVIRONMENTAL CONDITIONS FOR TRANSPORTATION OF WARMBLOODED ANIMALS OTHER THAN MARINE MAMMALS

Legal Authority: 7 USC 2131 to 2159

Abstract: This rulemaking would amend the Animal Welfare Act regulations regarding transportation of live animals other than marine mammals by removing the current ambient temperature requirements for various stages in the transportation of those animals. The action would replace those requirements with a single performance standard under which the animals would be transported under climatic and environmental conditions that are appropriate for their welfare. The regulations currently require that ambient temperatures be maintained within certain ranges during transportation, but animals may be transported at ambient temperatures below the minimum temperatures if their consignor provides a certificate signed by a veterinarian certifying that the animals are acclimated to temperatures lower than the minimum temperature. This proposal would make acclimation certificates for live animals other than marine mammals unnecessary. This rule would replace a previously published proposed rule, which we are withdrawing as part of this document, that would have required that the acclimation certificate for a dog or cat be signed by the owner of the dog or cat being transported rather than by a veterinarian. This

rulemaking does not address marine mammals due to their unique requirements for care and handling. We believe that establishing a single performance standard would ensure that warmblooded animals other than marine mammals are transported in climatic and environmental conditions that are not detrimental to their welfare while allowing for variations in climatic and environmental conditions that are suitable for individual animals.

33. INTERSTATE MOVEMENT OF CITRUS FRUIT

Legal Authority: 7 USC 7701 to 7772; 7 USC 7781 to 7786; 21 USC 136 and 136a

Abstract: This rulemaking amends the regulations to relieve restrictions that currently require citrus producers to ensure that citrus groves in the State of Florida are certified to be free of citrus canker prior to interstate movement of citrus fruit. This action also requires that all inspection of fruit for symptoms of citrus canker as well as treatments and packaging of citrus fruit to be moved interstate occur in packinghouses that operate under a compliance agreement with APHIS. This action allows the interstate movement of fresh citrus fruit from Florida, provided the fruit does not exhibit symptoms of citrus canker and

is handled in accordance with the regulations.

36. THERMAL REQUIREMENTS

Legal Authority: 5 USC 301; 7 USC 1989; 42 USC 1480

Abstract: The current Agency procedure, section 1924.6 (a)(3)(i)(A), requires that surety be provided when the construction contract exceeds \$100,000. This Procedure Notice changes the surety requirements in 1924-A [section 1924.6 (a)(3)(i)(A)] from a \$100,000 contract amount to the Rural Development Single-Family

Housing area lending limits, which will vary with the locality. This will liberalize the requirement for surety and take into account the increase in construction cost of single-family homes in the Rural Development's Single-Family Housing Program since the last revision (1980) to this section of the regulation. This should ease the burden on small contractors for whom obtaining surety is difficult and expensive, additionally reducing costs to our single-family housing borrowers.

37. PERFORMANCE STANDARDS FOR THE PRODUCTION OF PROCESSED MEAT AND POULTRY PRODUCTS; CONTROL OF LISTERIA MONOCYTOGENES IN READY-TO-EAT MEAT AND POULTRY PRODUCTS

Legal Authority: 21 USC 451 et seq; 21 USC 601 et seq

Abstract: FSIS has proposed to establish pathogen reduction performance standards for all ready-to-eat (RTE) and partially heat-treated meat and poultry products, and measures, including testing, to control *Listeria monocytogenes* in RTE products. The performance standards spell out the objective level of pathogen

reduction that establishments must meet during their operations in order to produce safe products but allow the use of customized, plant-specific processing procedures other than those prescribed in the earlier regulations. With HACCP, food safety performance standards give establishments the incentive and flexibility to adopt innovative, science-based food safety processing procedures and controls, while providing objective, measurable standards that can be verified by Agency inspectional oversight. This set of performance standards will include and be consistent with standards already in place for certain ready-to-eat meat and poultry products.

Proposed Rule Stage

38. • VOLUNTARY LABELING PROGRAM FOR DESIGNATED BIOBASED PRODUCTS

Legal Authority: PL 107-171

Abstract: The purpose of the program is to provide a "U.S.D.A. Certified Biobased Product" label for use on biobased products meeting certain criteria to be established in the proposed rule, to specify those criteria for gaining use of the label, establish a system to make the label available to manufacturers and vendors of biobased products, and to establish the labeling program.
